Reimagine Home Care with the Power of Automation

Challenges for Home Care Agencies

Home care agencies face numerous challenges, including caregiver recruitment and retention, complex caregiver-client matching, communication management, care quality monitoring, revenue cycle automation, claims processing complexities, and evolving compliance standards. They also deal with a multitude of systems, documents, and communication channels.

AutomationEdge CareFlos for Home Care Agency Processes

CareFlos are collection of ready to use AI and automation solutions for Home Health Care agencies including Home Care, Hospice and skilled nursing facilities. CareFlos can help optimize home health care agency processes by automating manual and repetitive tasks from intake to revenue cycle management and everything in between.

About AutomationEdge

AutomationEdge is a leading Hyperautomation platform with IT Automation, Robotic Process Automation (RPA), Conversational AI and Intelligent Document Processing capabilities to help healthcare organizations automate their data-intensive, manual and rule-based tasks across verticals.

Unlike other platforms, AutomationEdge has built a library of ready automation solutions called as CareFlos to automate healthcare and home care processes like EHR management, staff onboarding-offboarding, revenue cycle management, patient referral, patient electronic visit verification, caregiver churn, patient reporting, IT service desk tickets and more. These solutions reduce the time and cost of implementation and enable faster Go Live.

“

EVV automation has allowed Devoted Guardians to place a focus on quality of care versus managing manual time-consuming processes that add zero value to positive health outcomes. It is comforting to know that these critical processes are running consistently and accurately behind the scenes. This not only drives increased job satisfaction but also healthier and happier clients. It's been a Win-Win for everyone involved!
