

AI-powered SNF solutions

# Stop Losing Revenue to Manual Referral Intake

Skilled Nursing Facilities lose millions annually to eligibility errors, missed authorizations, and slow response times. CareFlo AI transforms your referral-to-admission process into a revenue-protecting powerhouse.

**\$27.4B**

Annual Improper Payments

**82%**

Turn away Referrals

**50%**

Staff time on Admin

The Hidden Revenue Drain

## Why SNFs are Bleeding Revenue

Every manual process is a potential denial, every delay is a lost admission.

Speed to Response Gap

**1 First Wins**

Hospitals broadcast referrals to multiple facilities. The first to respond with "Accept" usually secures the admission.

Eligibility Verification Failures

**2 100-Day Trap**

Admitting patients who've exhausted their Medicare SNF Days creates uncollectible bad debt—your biggest write-off risk.

Authorization Blind Spots

**3 Level Mismatch**

Medicare Advantage denials from "Level of Care" mismatches mean you provide expensive care that won't get paid.

After-Hours Referral Loss

**4 24/7 Gap**

Nights and weekends referrals queue up while competitors respond. Morning staff inherit a backlog of lost opportunities.

SNF-Specific Challenges

## What Makes SNF Intake Different

Unique Medicare rules demand specialized automation.

**Must Verify**

100-day Benefit Limit

Check exact "SNF Days" remaining on every Medicare patient before admission

**Mandatory**

3-Day Qualifying Stay

Cross-reference hospital discharge dates against 3-midnight inpatient requirement

**High Risk**

Consolidated Billing

Facility pays for meds, labs & transport. High-cost keywords need instant flagging

The CareFlo Advantage

## Intelligent Referral Automation

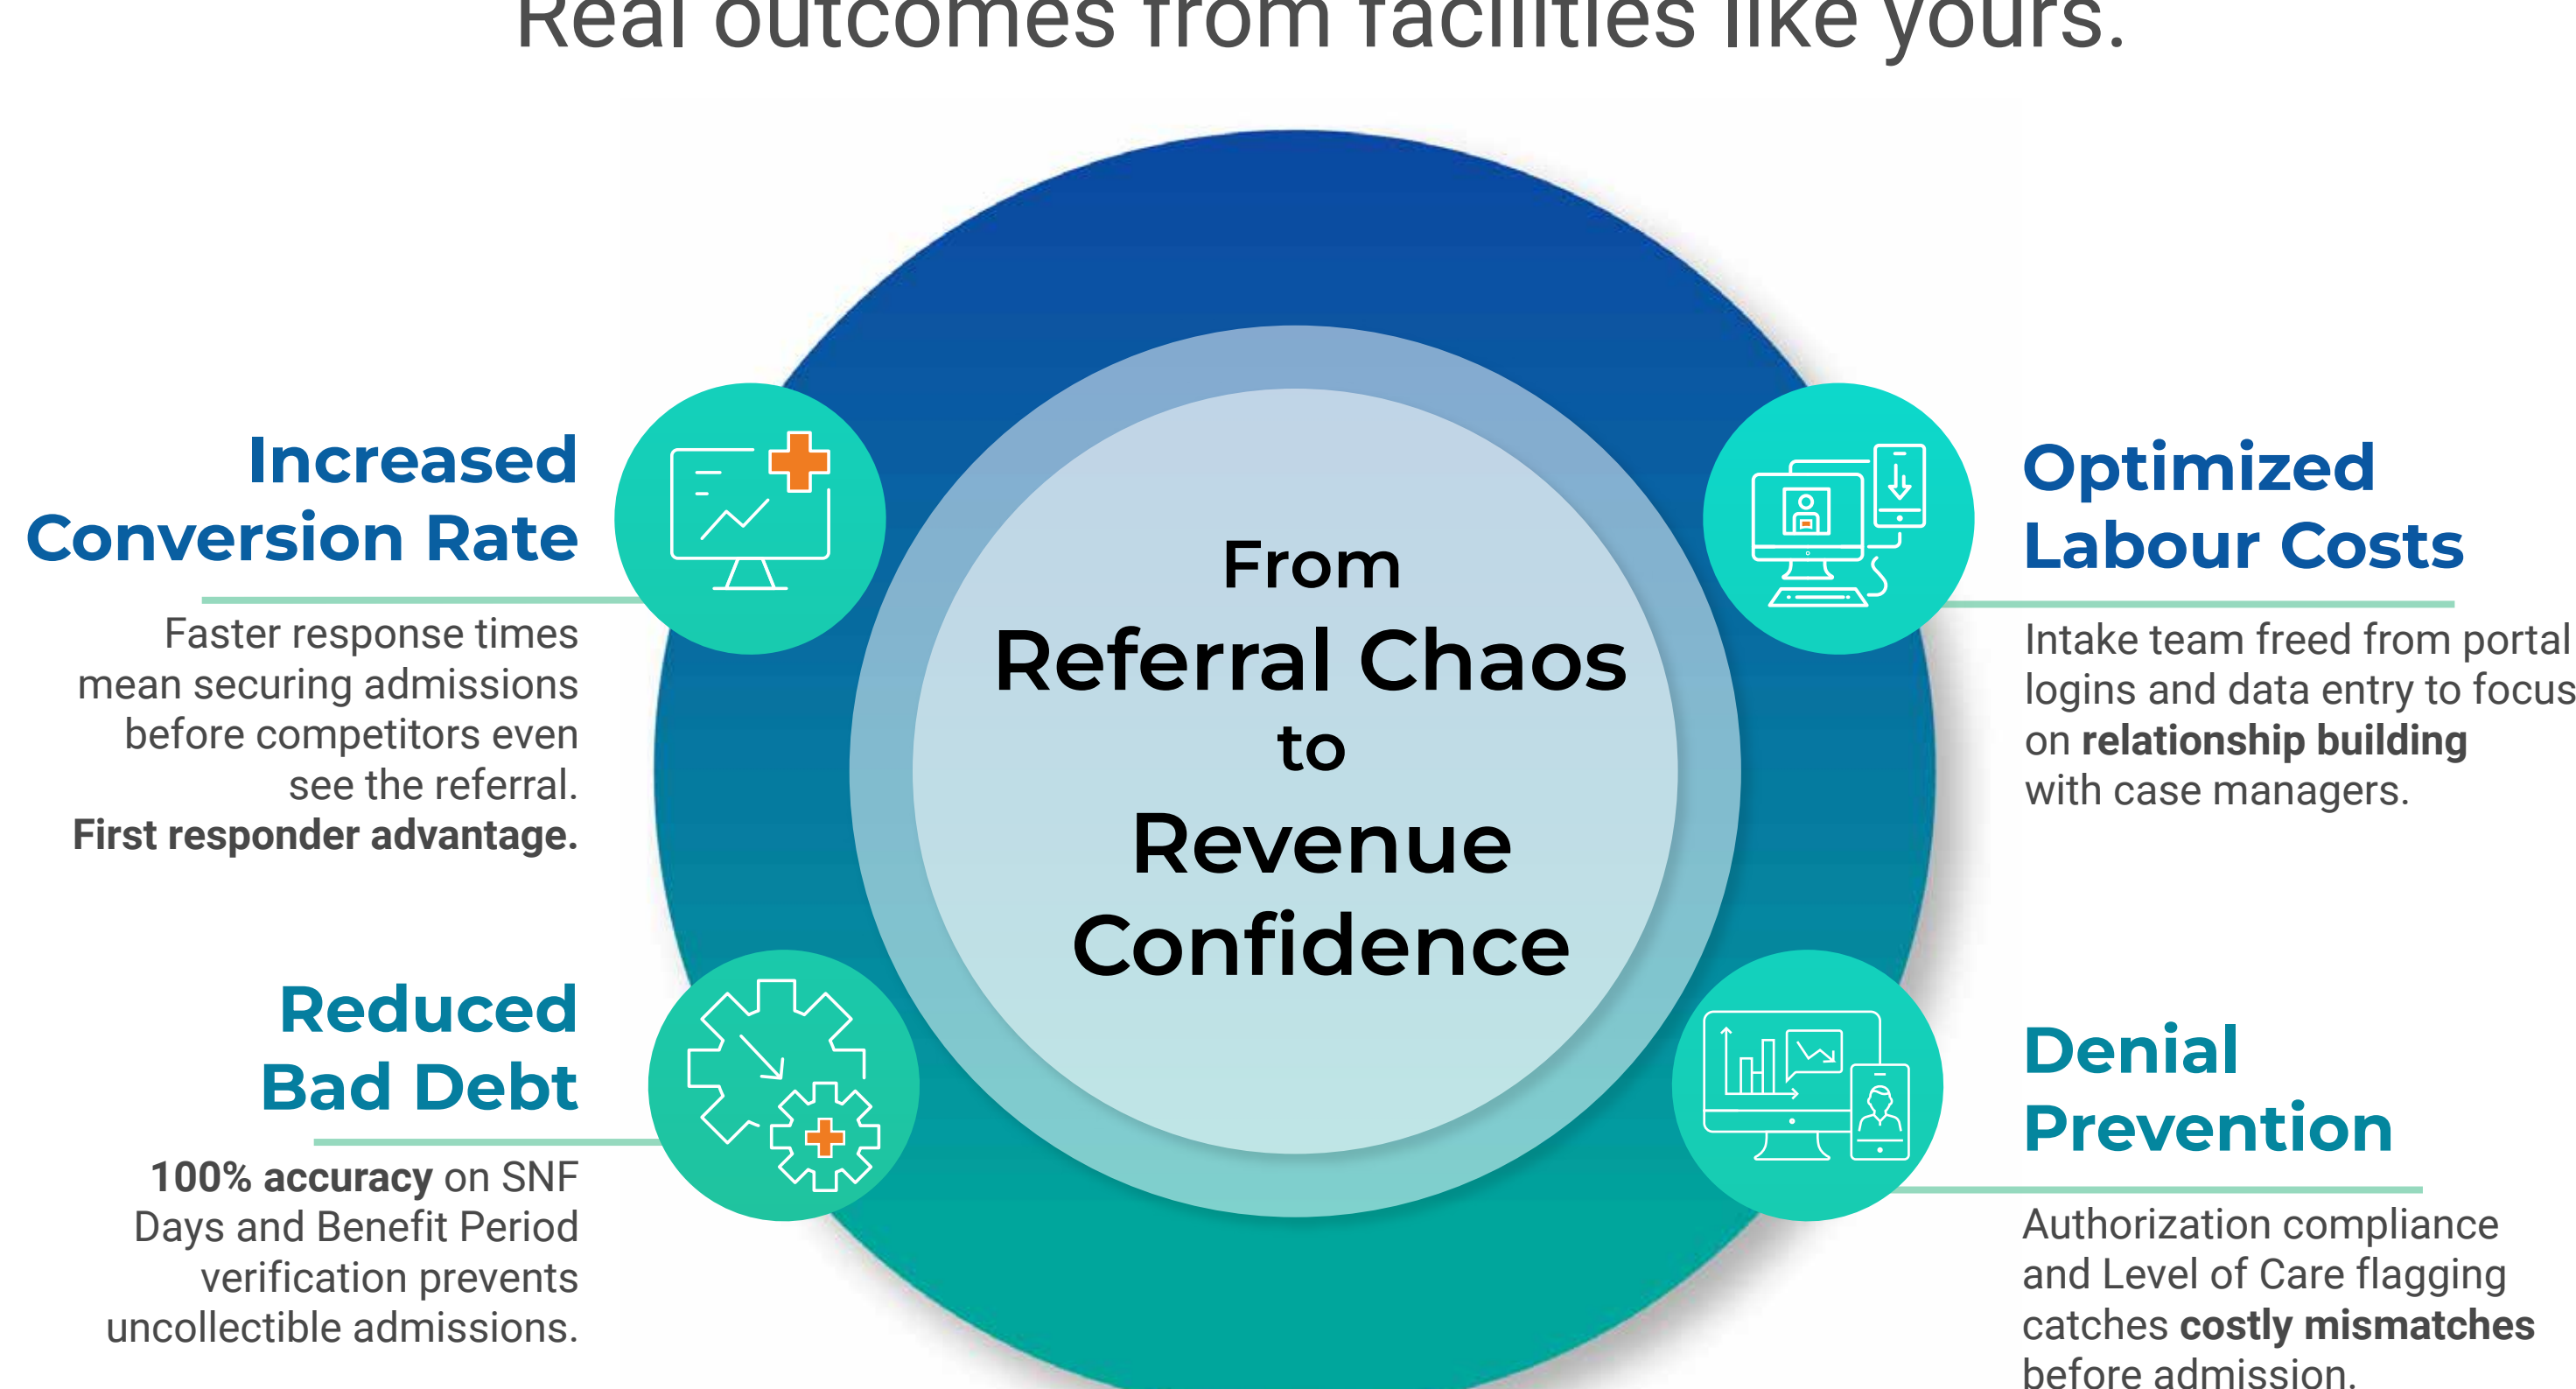

From portal to EMR in minutes, not hours.

- 1 Multi-Portal Document Capture**  
Automatically downloads referrals from EPIC, CarePort, naviHealth, Allscripts—even during off-hours.
- 2 AI-Powered Data Extraction**  
Extracts demographics, diagnoses, PASRR status, and clinical documentation with intelligent parsing.
- 3 SNF-Specific Eligibility Engine**  
Validates SNF Days, 3-Day Stay, MSP alerts, and flags high-cost keywords automatically.
- 4 Smart Authorization Handling**  
Identifies prior auth requirements, Level of Care matches, and Medicare Advantage rules.
- 5 Instant EMR Integration**  
Creates patient charts, populates all tabs, uploads documents, and triggers MDS schedules.

Proven Results

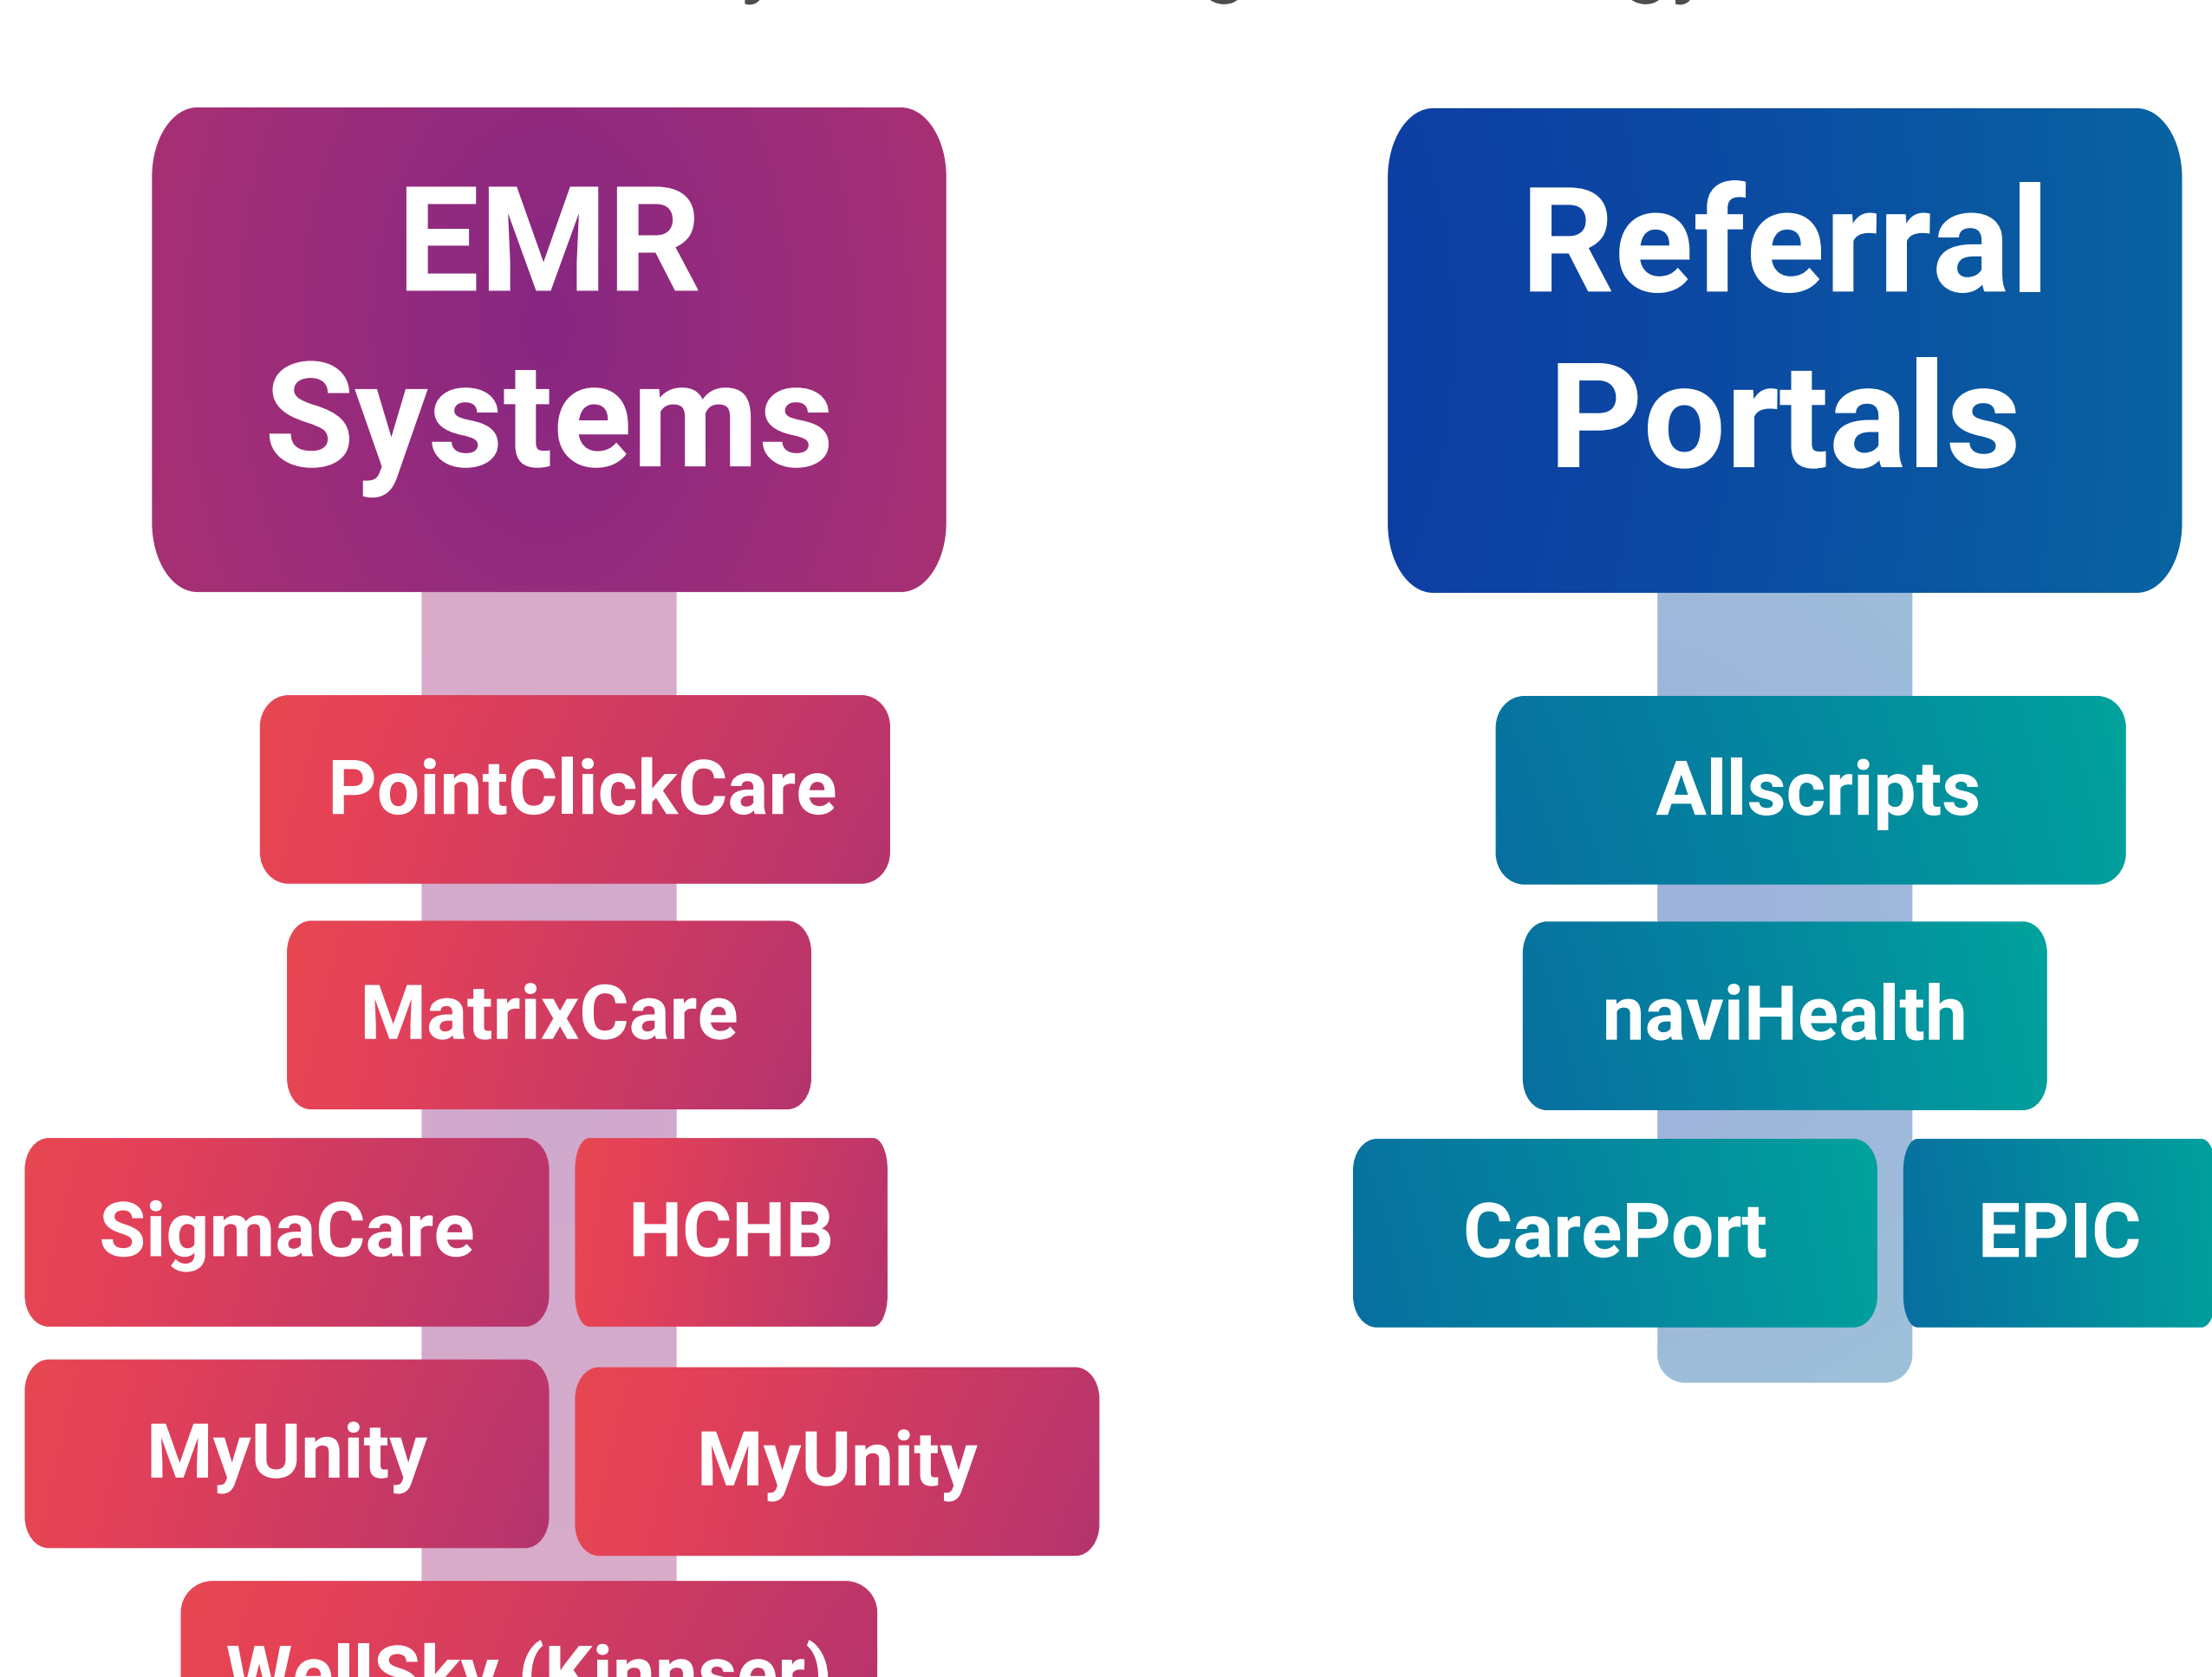

## Transformative Impact

Real outcomes from facilities like yours.

## Seamless Integration

Works with your existing technology stack.
