IT SolFlos

Importance and Benefits of AutomationEdge's SolFlos

Homecare & Healthcare SolFlos

Importance
Homecare and healthcare struggle with employee, patient, and caregiver experience. Improving efficiencies is also a major priority.

Advantages
AutomationEdge provides integrated hyperautomation solutions with accelerators (SolFlo) for Healthcare and Homecare industries. These SolFlos help in caregiver motivation, regulatory requirements, new business acquisition (referral), patient servicing (intake), employee serving (IT, HR, Finance), revenue cycle management, etc.

Banking, Insurance, and Financial

Importance
The Banking, Insurance, and Financial industry has unique needs for automation. They struggle with using multiple providers to achieve automation goals. They need faster time to market because of the nature of the industry and competition in the market.

Advantages
AutomationEdge provides prebuilt automation solutions (SolFlo) for Banking, Insurance, and Financial services industry. These solutions include common workflows (e.g. reconciliation workflows, lending-related workflows, customer servicing-related workflows, etc.), document extraction for documents processed, APIs needed on-premise or on-cloud, email contact center automation, chatbot dialogs, compliance workflows to meet regulatory requirements- all specific to this industry.

HR, IT & Finance SolFlos

Importance
The industry wants to lower the cost of operations and improve the employee experience to serve customers better. - The automation projects often don't justify the investments in HR and Finance and fail to improve employee experience significantly.

Advantages
AutomationEdge provides an employee super app with automation and document processing AI at the back end and conversational AI and chatbot (MS Teams and WhatsApp are popular channels) at the front end. - The employee gets a single window in MS Teams or WhatsApp channel during onboarding, automatically resolving common queries from employees for IT, HR, finance, and admin department, automation for their own productivity improvement, proactive notification to employees for actions to be taken, etc.
