

Why Value-Based Care Is Becoming Unavoidable for Home Health?

What Is Value-Based Care in Home Health?

"Better outcomes = better reimbursement"

Agencies are measured on:

Patient Outcomes

Total Cost of Care

Patient Experience

Higher Performance = More Referrals, Stronger Networks, Bonus Payments

Value-Based Care for Home Health

MA Value-Based Contracts
Payment based on quality and cost, not visits. High performers get more referrals and bonuses.

Episodic Bundles
One payment covers an entire episode of care. Forces efficient resource management and improved results.

Shared Savings
Agencies share financial rewards for reducing spending and improving outcomes. Direct revenue upside for better care.

Preferred Networks
Payers refer patients only to agencies meeting quality thresholds. High-quality agencies gain volume.

Key Metrics that Matter in Value-Based Home Health

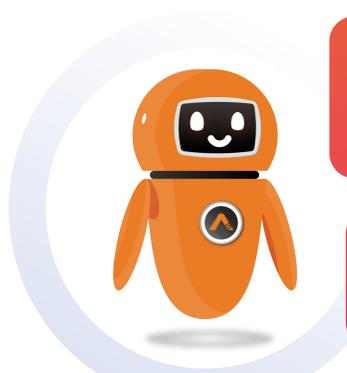

Core Challenges that Agencies Must Overcome

Workforce Shortage & Burnout

Technology & Data Gaps

Culture & Skill

Where AI Fits in Value Based Home Health Care

Clinical Documentation
AI improves documentation quality by extracting and organizing clinical data automatically. It also match signatures and perform verification checks to enhance OASIS accuracy, and use NLP to detect inconsistencies or missing information.

Workforce Management & Engagement
AI addresses workforce strain by optimizing schedules and routes, matching the right clinician to the right patient. This capability increase staff productivity, reduce burnout, and tracking staff training.

Care Coordination & Monitoring
AI enhances care coordination by predicting patient risk, triggering early interventions, and supporting collaborative care.

Referral Intake & Triage
AI strengthens intake by intelligent referral evaluation, automated eligibility & authorization, and instant referral summaries.

Automation Capabilities for Creating Value Based Home Healthcare Model

	Description	Impact on Value-Based Care
Referral Intake	Automates referral data capture and routing	Reduces referral leakage, Shortens time-to-start-of-care
Referral Assure	Evaluates referral quality and acceptance patterns	Supports better outcomes, improved resource utilization
Eligibility Check	Automates verification of benefits and authorizations	Ensures accurate approvals, reduces billing errors
OASIS Assessment	Assists with accurate and complete OASIS documentation	Drives stronger outcome scores, lowers audit risk
EMR Integration	Connects disparate systems for seamless data flow	Strengthens care coordination, provides real-time insights
E-Fax for Physicians	Streamlines communication with physicians	Reduces delays, supports compliance, improves continuity
