- [CONTACT DETAILS](#)

Release Specifications

Version: 5.6.2

Type: Patch

Date: 15/09/2020

Release Artifacts

AE Engine
WAR

AEUI
WAR

*AutomationEdge Server V5.6.2 is compatible with Process Studio V5.6.0

Browsers Supported for AEUI

57 & above

80 & above

11

52 & above

You can download earlier version Release Notes by clicking on the respective versions:
[5.6.0](#), [5.6.1](#).

Fixed Issues

- Controller Agent assignment issue has been resolved hence addressing the issue of some controller agents not connecting to the correct or required AutomationEdge agents.
- User creation via *Bulk Upload* feature can now be used for users who will be using SSO Authentication mechanism.

Security Enhancements

- Advisory: We recommend upgrading Tomcat 9 to the latest version (or not older than 9.0.35) as security vulnerabilities have been identified in versions 9.0.31 and 9.0.32

Known Issues / Limitations

- The Status of Integration Services is displayed as UNKNOWN intermittently (for few seconds), on AutomationEdge UI, although the Service may be running.
- The *Time Zone* option under the *Polling Schedule* section of Integration > Type Configuration menu is disabled. The default time zone of the machine on which integration service is deployed will be used for Polling schedule
- A redundant update status message is displayed for all existing plugins in PS after the *Plugin Sync* operation if any plugin is assigned to or removed from a tenant.
- Copy Query option in Add/Edit Templates in Reports tab on AEUI does not work for IE browser.
- No email notification is sent when a workflow configuration parameter is removed; even after configuring '*Workflow Create and Update*' notification in Settings menu in AEUI
- An incorrect the email notification – 'Parameter is added' instead of 'Parameter is changed' – is sent when the value of a configuration parameter is changed
- While Downloading Requests from AEUI, Created and Completed dates need to be formatted as 'Date' in Microsoft Excel in the downloaded CSV file
- WebGUI workflows must always be marked as sequential. If one of the WebGUI automation workflows running as non-sequential workflow is terminated, then all the subsequent requests remain in *New* state.
- Agents will acquire Tenant level proxy settings (If Any) during upgrades discarding the Agent level proxy settings. The required changes need to be done manually
- Agent restart features in not supported on Linux based OS
- Agent type cannot be changed when the Agent is in *Unknown* state
- Existing workflows will not open if Process Studio Distribution folder path has any special characters.
- SSO authentication is not supported for users with *Sysadmin* role or users who want to use the Process Studio
- Process Studio is not fully supported in Mac i.e. Plugin Sync feature is not supported on Mac.
- Any type of UI Automation (Web/Desktop/Surface) is not supported in Linux based OS
